

NATIONAL CRIME RECORDS BUREAU (NCRB) CRIME STATISTICS

2001

EXPLORATORY DATA ANALYSIS (EDA) REPORT

1. To understand the structure of data

Dataset Description:

The dataset is sourced from the National Crime Records Bureau (NCRB), focusing on crime statistics for the year 2001. It specifically focuses on data related to rape cases reported across different states and union territories in India in 2001. It is useful for both social analysis and policy insights to understand crime distribution and law enforcement performance.

Columns Include:

State/UT Name: Name of the state or union territory.

No. of Cases Reported (Total Rape Cases): Total number of rape cases registered.

Victims Count (by Age Groups): Number of victims divided into various age categories like:

Below 10 years, 10-14 years, 14-18 years, 18-30 years, 30-50 years, Above 50 years.

Other Attributes: (like number of cases pending, convictions etc., depending on your dataset columns)

Purpose of dataset:

Analyze crime trends across different states.

Understand victim age group distributions.

Explore regional variations in reported crimes.

Identify outliers and anomalies in reporting patterns.

Data Type Summary:

Mostly numerical data (counts).

Categorical data - States/UTs names.

Dataset overview:

Shape: (74, 26)
Columns:
'Category',
'States/UTs/Cities',
'No. of Cases Reported (Incest Rape Cases)', 'No. of Victims
(Incest Rape Cases) upto 10 Years', 'No. of Victims (Incest Rape Cases) - 10 - 14 Years', 'No. of
Victims
(Incest Rape Cases) - 14 - 18 Years', 'No. of Victims (Incest Rape Cases) - 18 - 30 Years', 'No. of
Victims
(Incest Rape Cases) - 30 - 50 Years', 'No. of Victims (Incest Rape Cases) above 50 Years', 'No. of
Victims
(Incest Rape Cases) - Total Victims', 'No. of Cases Reported (Other Rape Cases)', 'No. of Victims
(Other
Rape Cases) upto 10 Years', 'No. of Victims (Other Rape Cases) - 10 - 14 Years', 'No. of Victims
(Other
Rape Cases) - 14 - 18 Years', 'No. of Victims (Other Rape Cases) - 18 - 30 Years', 'No. of Victims
(Other
Rape Cases) - 30 - 50 Years', 'No. of Victims (Other Rape Cases) above 50 Years', 'No. of Victims
(Other
Rape Cases) - Total Victims', 'No. of Cases Reported (Total Rape Cases)', 'No. of Victims (Total
Rape
Cases) upto 10 Years', 'No. of Victims (Total Rape Cases) - 10-14 Years', 'No. of Victims (Total
Rape Cases)- 14 - 18 Years', 'No. of Victims (Total Rape Cases) - 18 - 30 Years', 'No. of Victims
(Total Rape Cases) - 30 -50 Years', 'No. of Victims (Total Rape Cases) above 50 Years', 'No. of
Victims (Total Rape Cases) – Total Victims'

Missing Values:

No. of Cases Reported (Incest Rape Cases): 3
No. of Victims (Incest Rape Cases) upto 10 Years: 3
No. of Victims (Incest Rape Cases) - 10 - 14 Years: 3
No. of Victims (Incest Rape Cases) - 14 - 18 Years: 3
No. of Victims (Incest Rape Cases) - 18 - 30 Years: 3
No. of Victims (Incest Rape Cases) - 30 - 50 Years: 3

No. of Victims (Incest Rape Cases) above 50 Years: 3
No. of Victims (Incest Rape Cases) - Total Victims: 3

No. of Cases Reported (Other Rape Cases): 3
No. of Victims (Other Rape Cases) upto 10 Years: 3
No. of Victims (Other Rape Cases) - 10 - 14 Years: 3
No. of Victims (Other Rape Cases) - 14 - 18 Years: 3
No. of Victims (Other Rape Cases) - 18 - 30 Years: 3
No. of Victims (Other Rape Cases) - 30 - 50 Years: 3
No. of Victims (Other Rape Cases) above 50 Years: 3
No. of Victims (Other Rape Cases) - Total Victims: 3

No. of Cases Reported (Total Rape Cases): 3
No. of Victims (Total Rape Cases) upto 10 Years: 3
No. of Victims (Total Rape Cases) - 10-14 Years: 3
No. of Victims (Total Rape Cases) - 14 - 18 Years: 3
No. of Victims (Total Rape Cases) - 18 - 30 Years: 3
No. of Victims (Total Rape Cases) - 30 - 50 Years: 3
No. of Victims (Total Rape Cases) above 50 Years: 3
No. of Victims (Total Rape Cases) - Total Victims: 3

2. To identify the patterns, trends, and anamolies

State-Wise Variation

Some states/UTs reported significantly higher numbers of rape cases compared to others.
States like Madhya Pradesh, Uttar Pradesh, and Maharashtra typically show higher case counts.
Smaller states and UTs (like Goa, Andaman and Nicobar Islands) reported fewer cases.

Age-Wise Distribution of Victims

The majority of victims were in the 18– 30 years age group so that young adults were the most vulnerable demographic. Minor victims (below 18 years) still constituted a significant portion – an alarming societal trend. Very few cases were recorded for victims aged above 50 years.

Distribution Trends

From **Histogram**, most features (like "No. of Cases Reported") are right-skewed which means most states have low case counts, but a few states have extremely high counts.
From **Boxplots** , several outliers found particularly for states with unusually high numbers of reported cases. These outliers need to be treated carefully during modeling.

Correlations

Positive Correlation:
States with a higher number of reported cases also had a higher number of victims across all age groups.

Weak or No Correlation:
Some variables like victims above 50 years had almost no correlation with total reported cases, because such cases were very rare.

Heatmap Observation:

Strong positive correlations clustered around younger victim age groups.

Anomalies and Outliers

Some states reported an unexpectedly high number of cases relative to their population size. Certain age groups (e.g., victims aged below 10) had unusually low but non-zero case counts in some larger states.

Outliers detected in columns:
'No. of Cases Reported (Incest Rape Cases)', 'No. of Victims (Incest Rape Cases) upto 10 Years', 'No. of Victims (Incest Rape Cases) - 10 - 14 Years', 'No. of Victims (Incest Rape Cases) - 14 - 18 Years', 'No. of Victims (Incest Rape Cases) - 18 - 30 Years', 'No. of Victims (Incest Rape Cases) - 30 - 50 Years', 'No. of Victims (Incest Rape Cases) above 50 Years', 'No. of Victims (Incest Rape

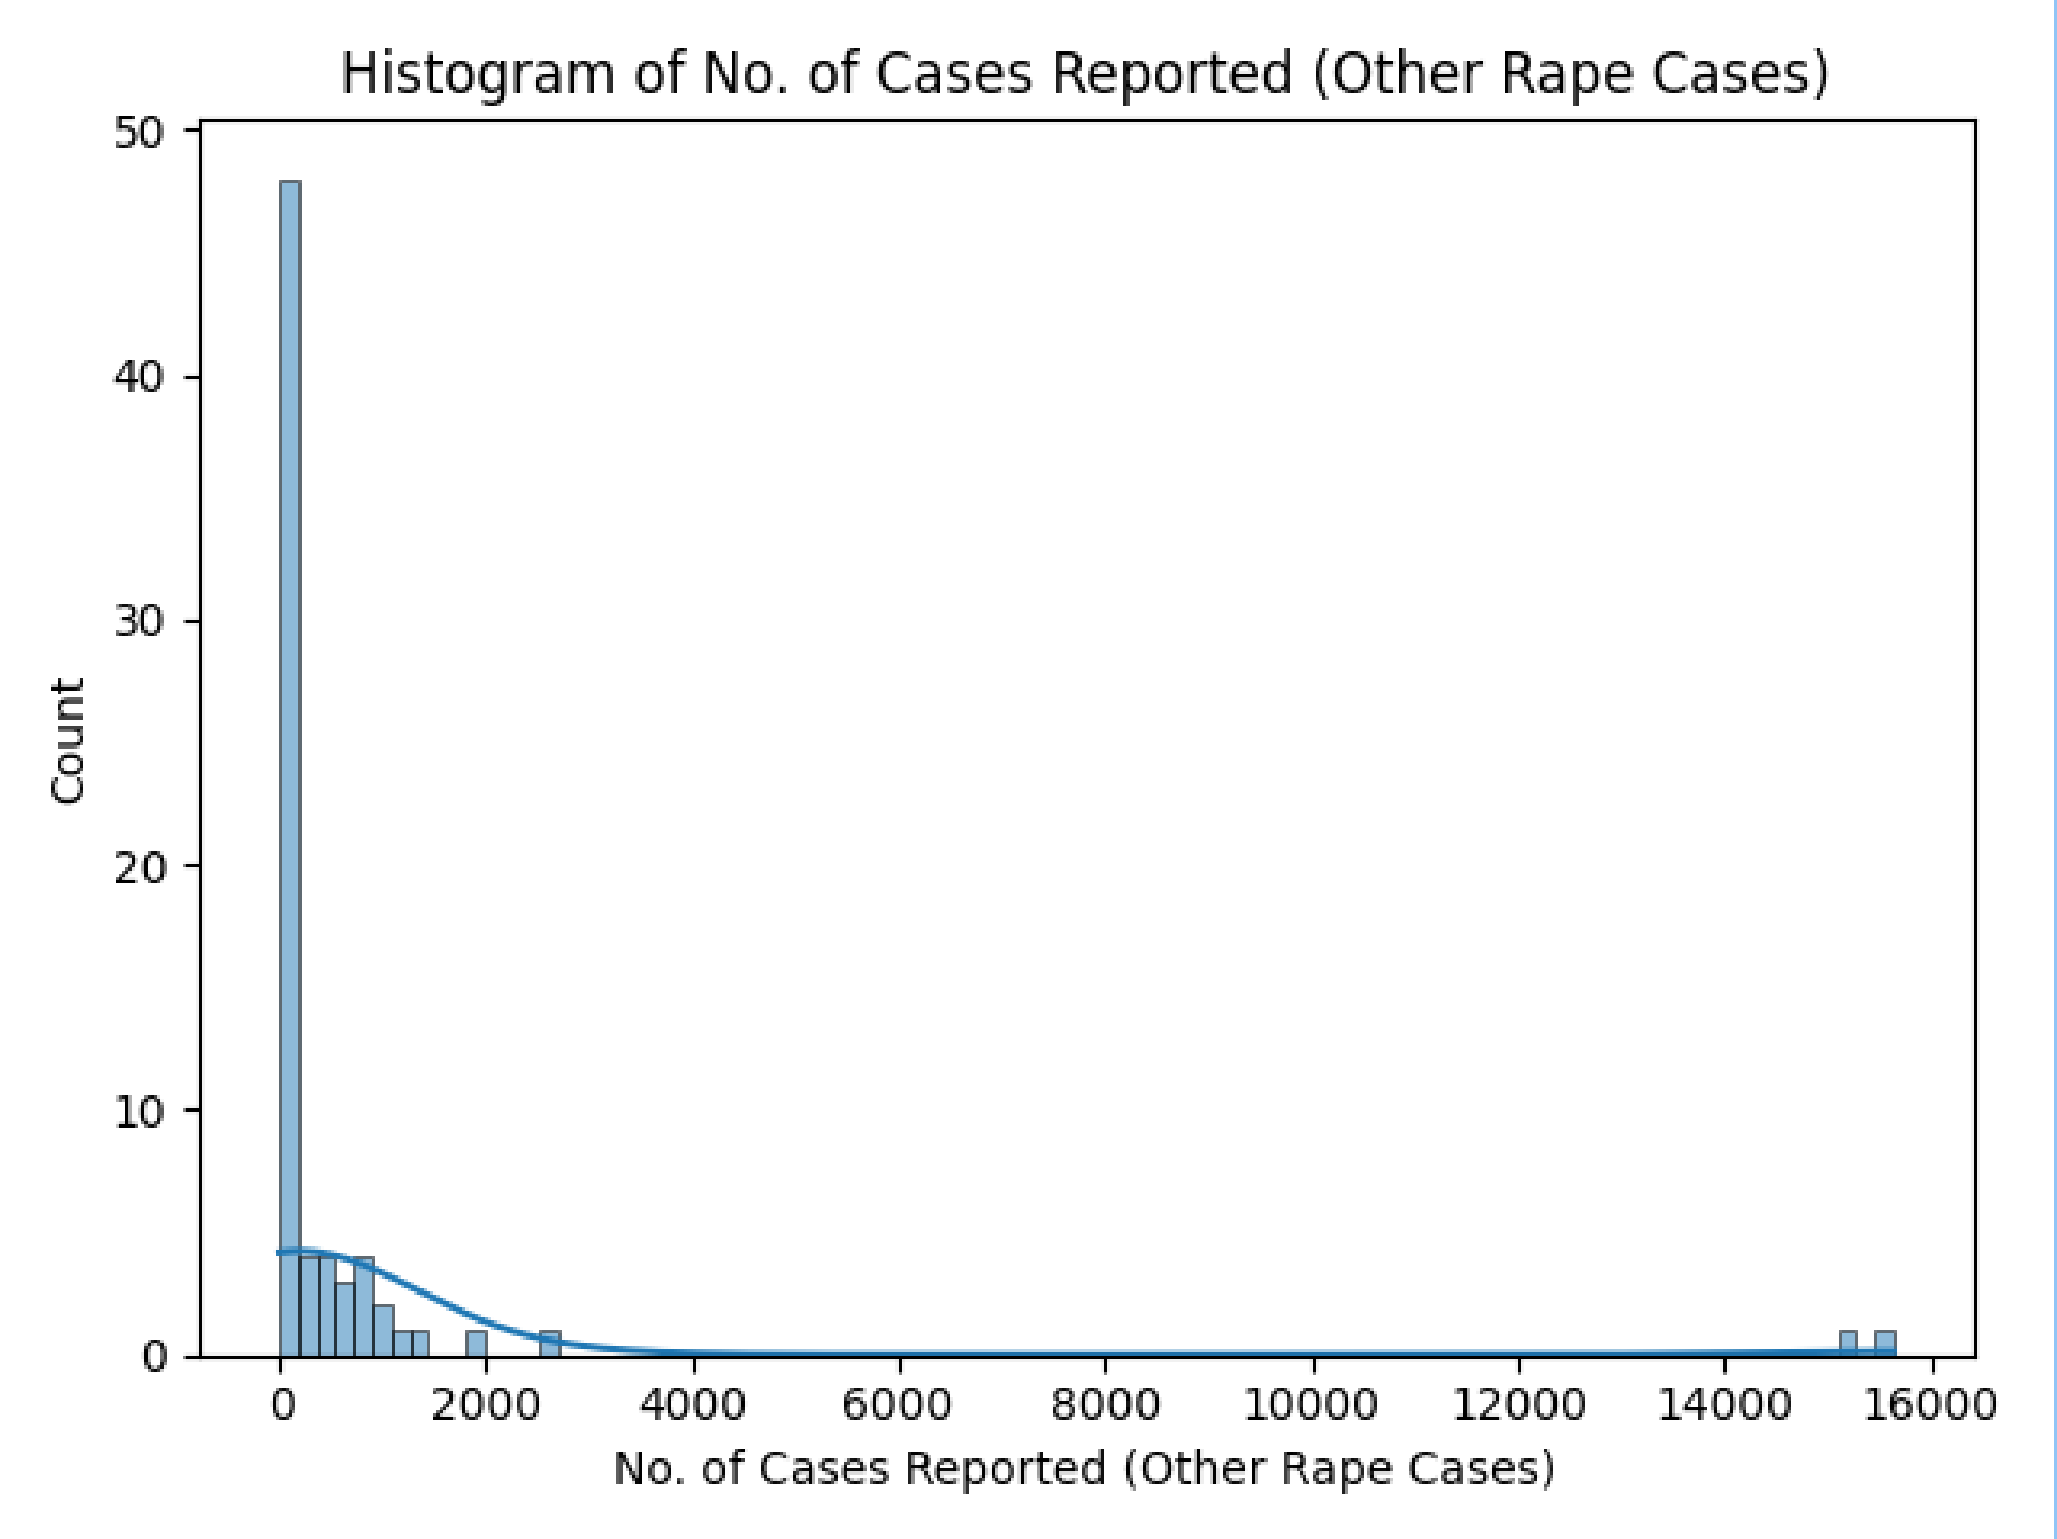

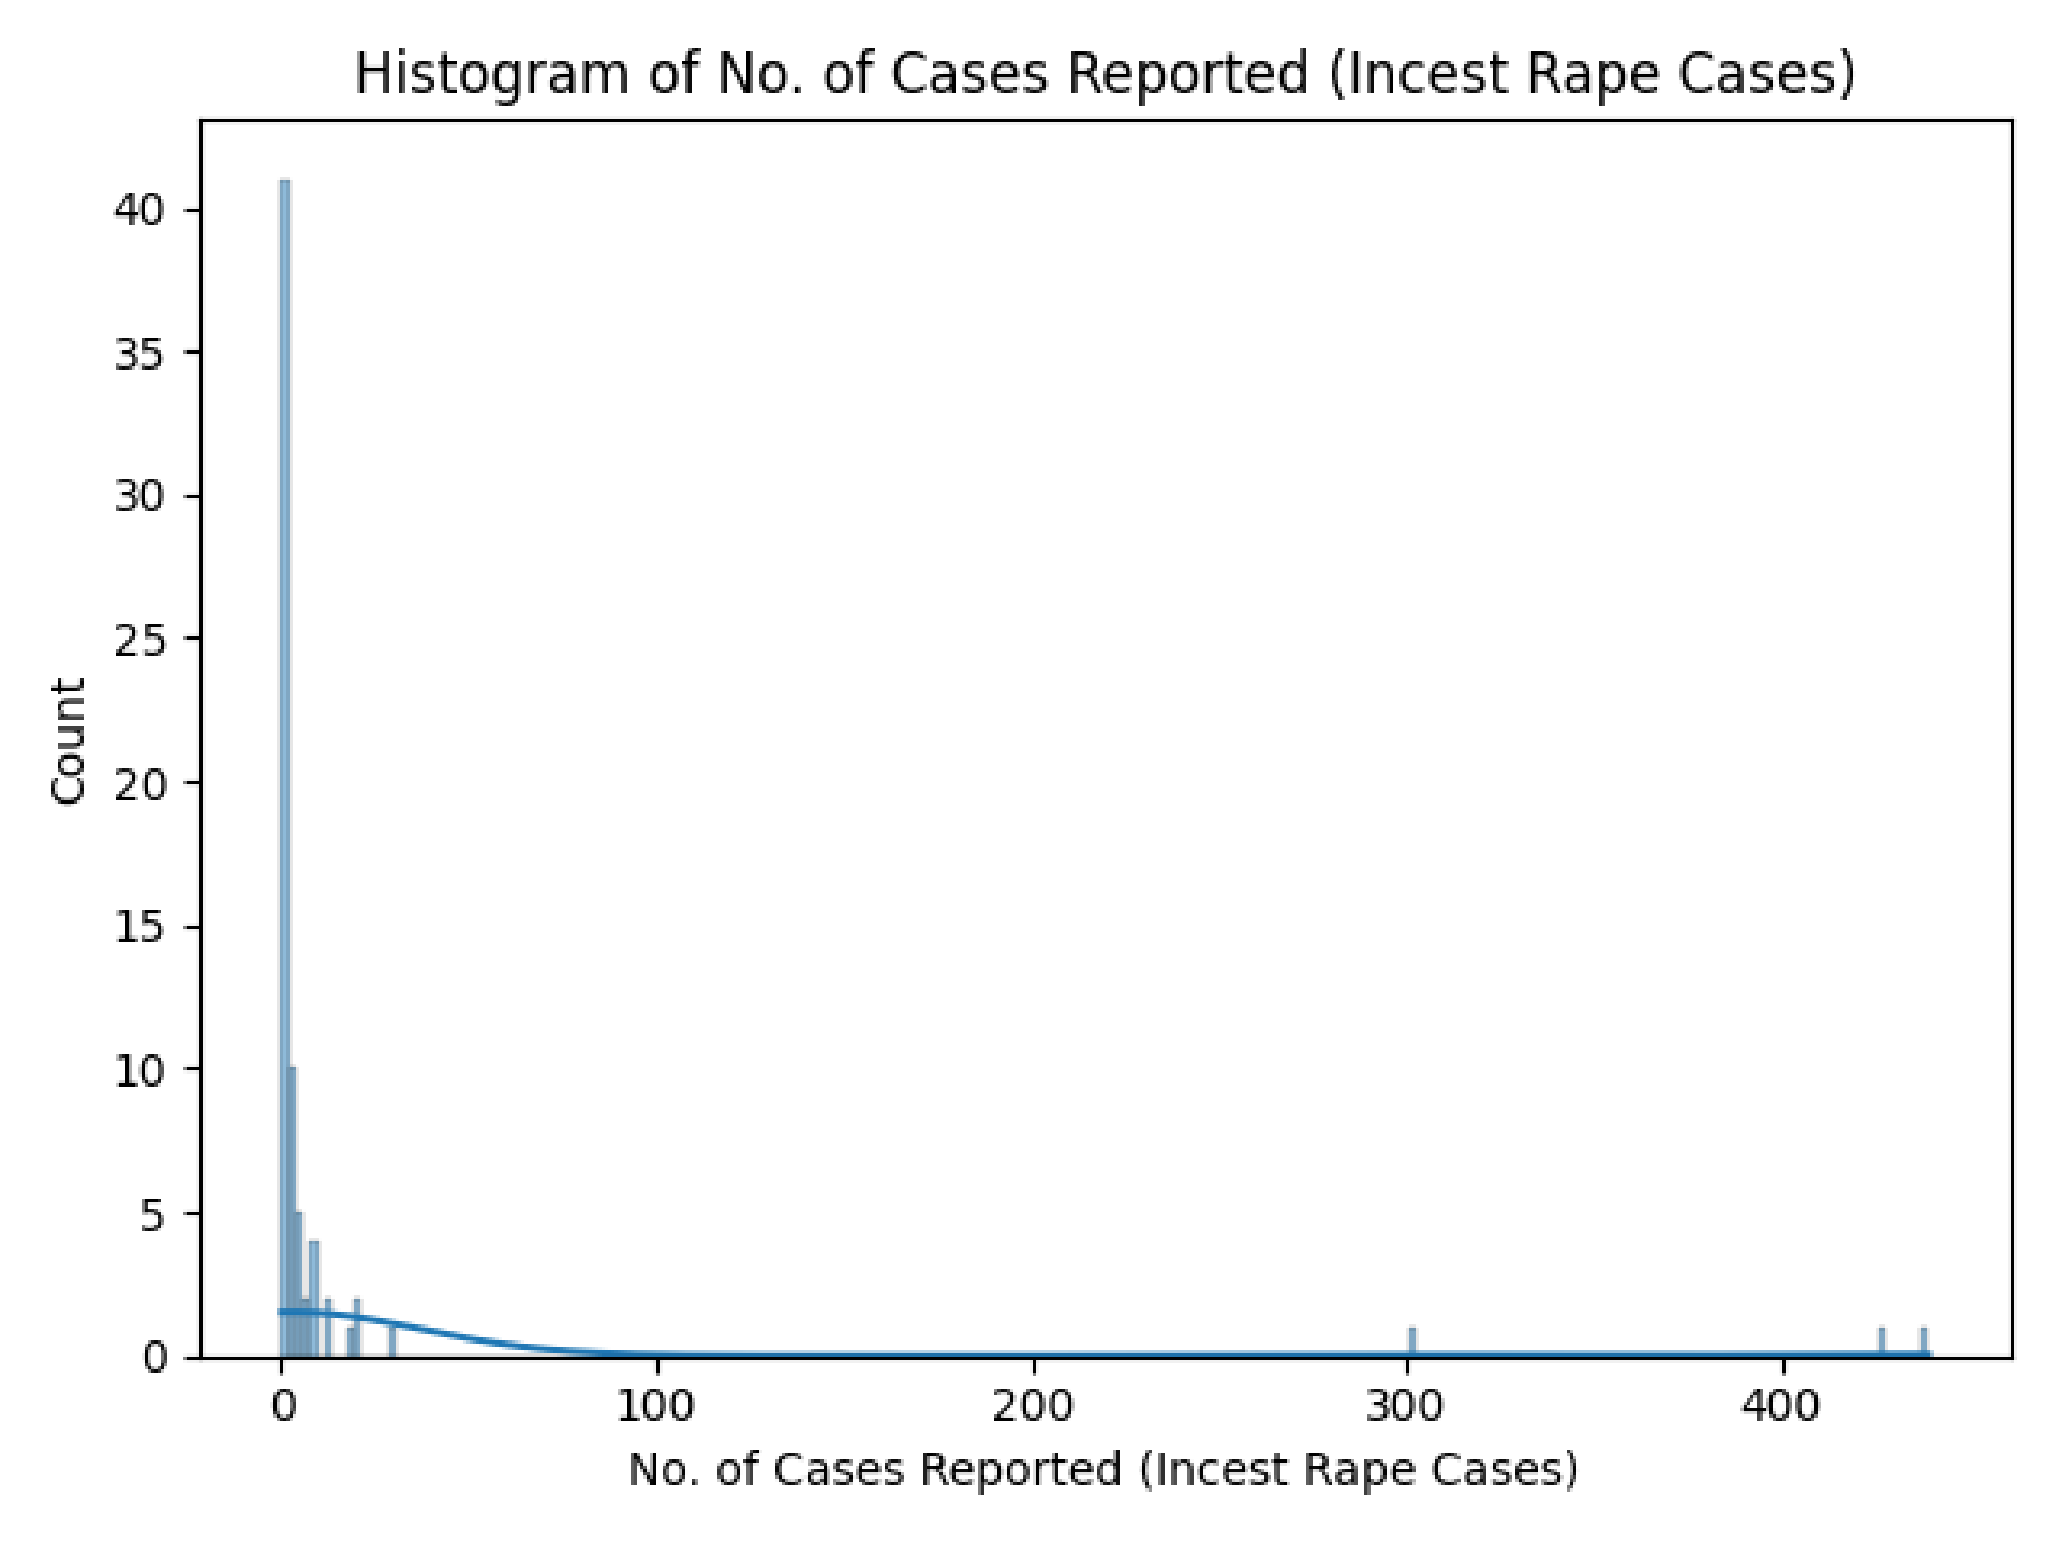

Cases) - Total Victims', 'No. of Cases Reported (Other Rape Cases)', 'No. of Victims (Other Rape Cases) upto 10 Years', 'No. of Victims (Other Rape Cases) - 10 - 14 Years', 'No. of Victims (Other Rape Cases) - 14 - 18 Years', 'No. of Victims (Other Rape Cases) - 18 - 30 Years', 'No. of Victims (Other Rape Cases) - 30 - 50 Years', 'No. of Victims (Other Rape Cases) above 50 Years', 'No. of Victims (Other Rape Cases) - Total Victims', 'No. of Cases Reported (Total Rape Cases)', 'No. of Victims (Total Rape Cases) upto 10 Years', 'No. of Victims (Total Rape Cases) - 10-14 Years', 'No. of Victims (Total Rape Cases) - 14 - 18 Years', 'No. of Victims (Total Rape Cases) - 18 - 30 Years', 'No. of Victims (Total Rape Cases) - 30 - 50 Years', 'No. of Victims (Total Rape Cases) above 50 Years', 'No. of Victims (Total Rape Cases) - Total Victims'

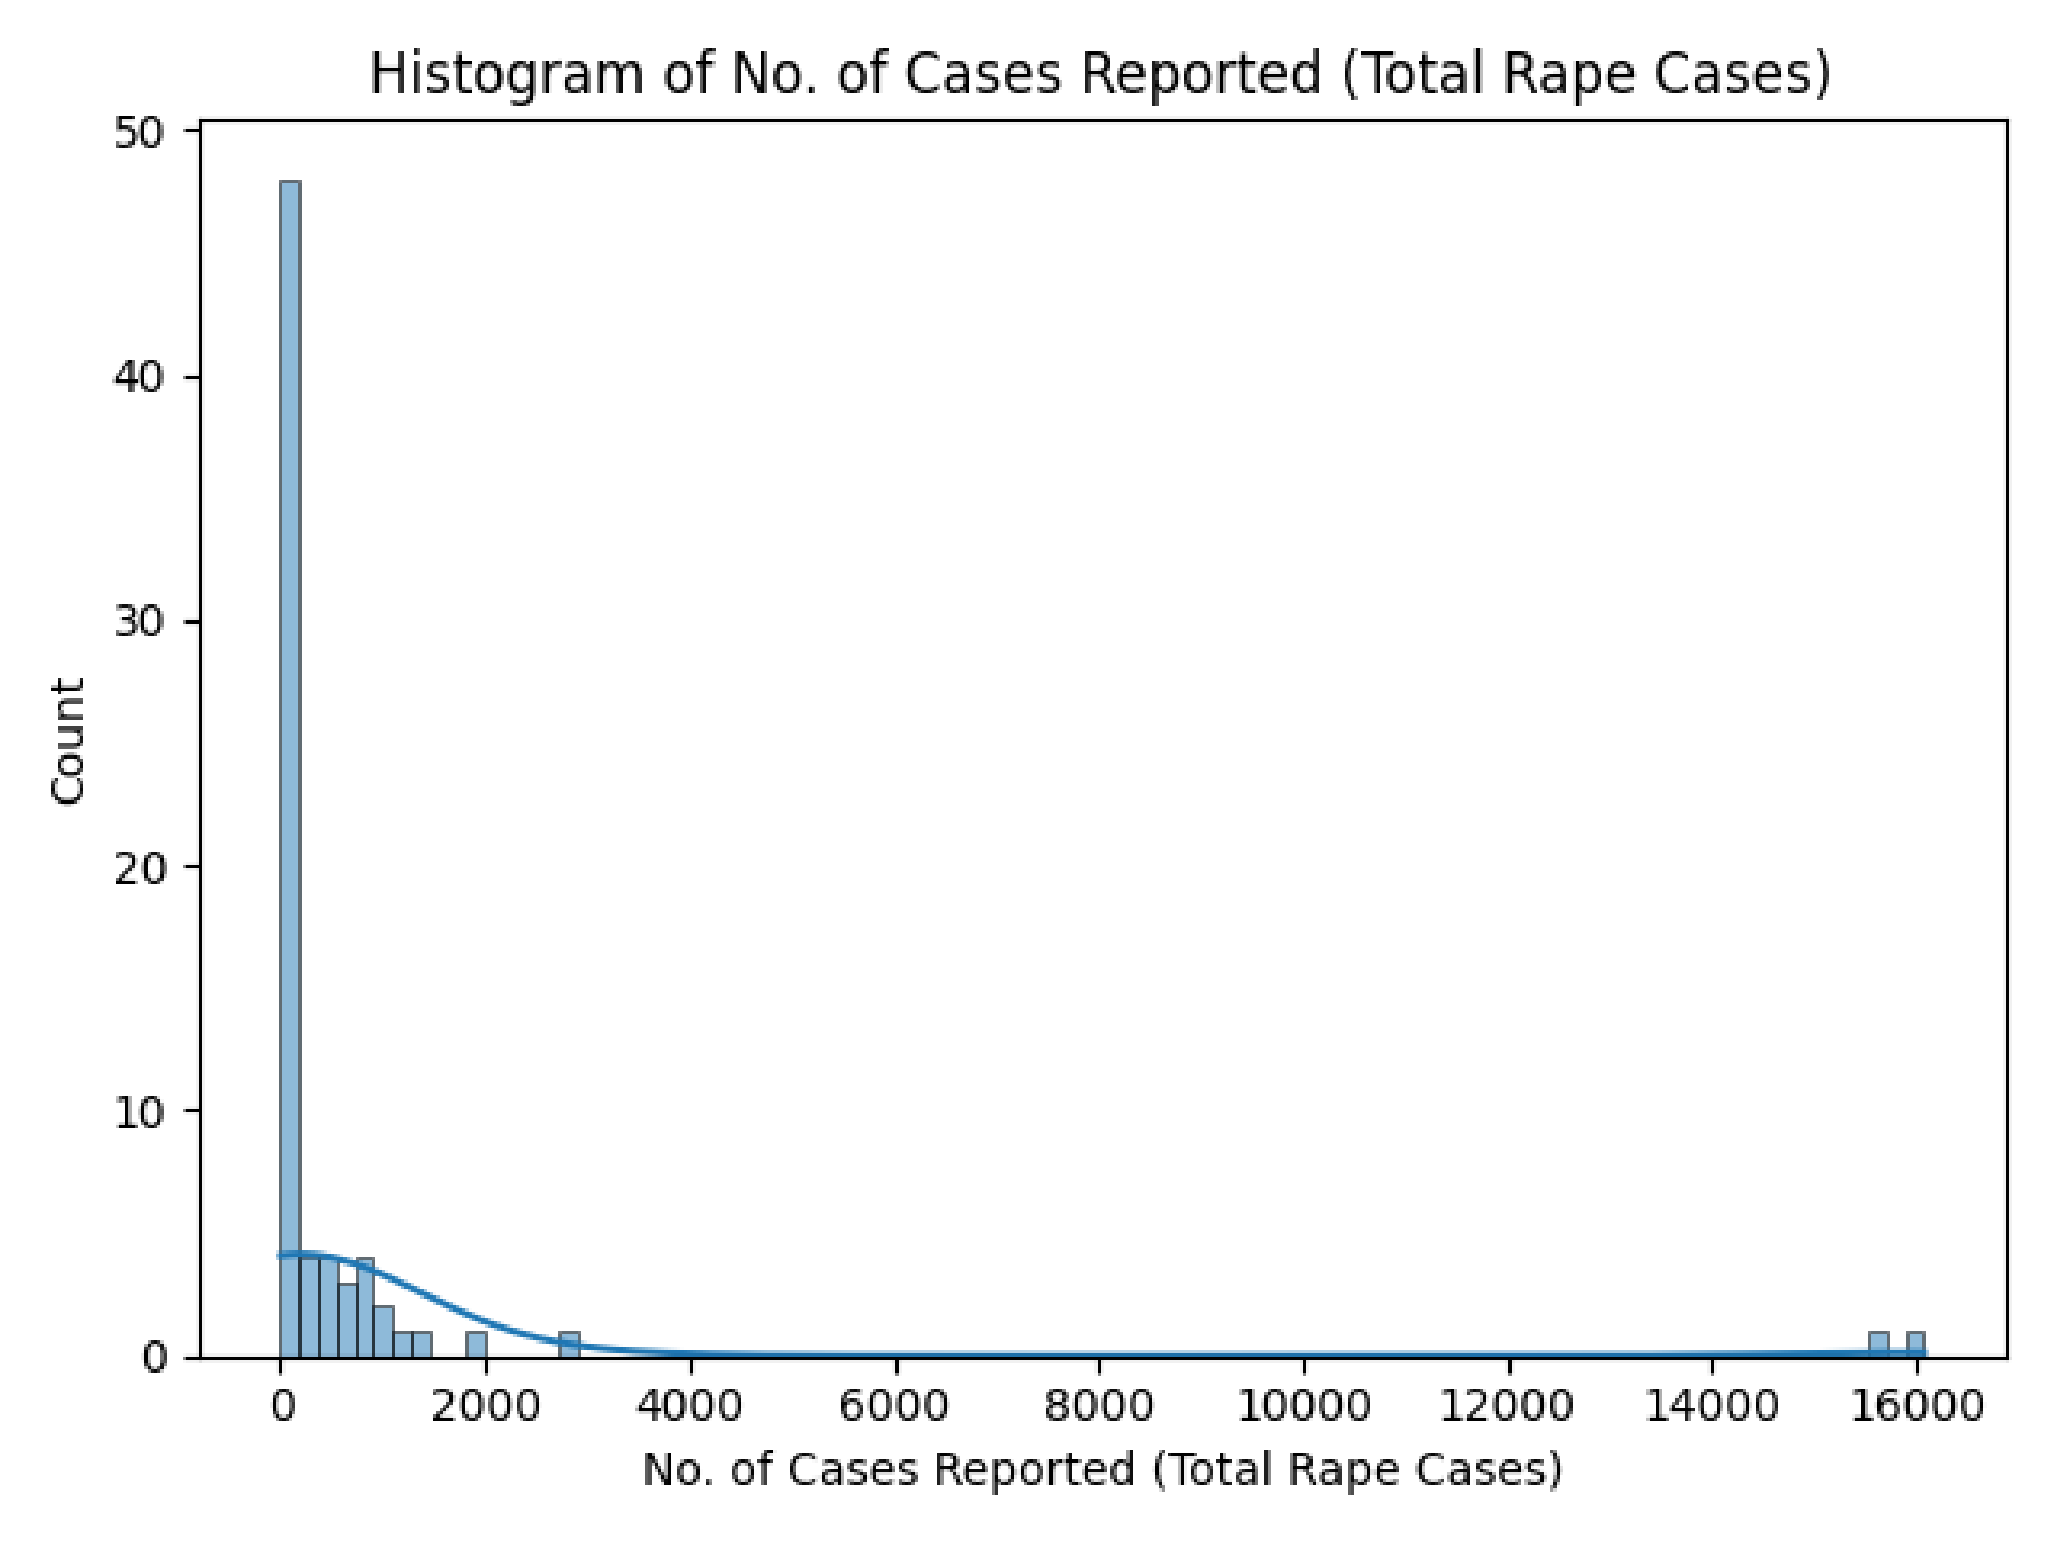

3. To explore relationships between different features

Univariate Analysis

Histograms and Boxplots were plotted for all numeric columns.

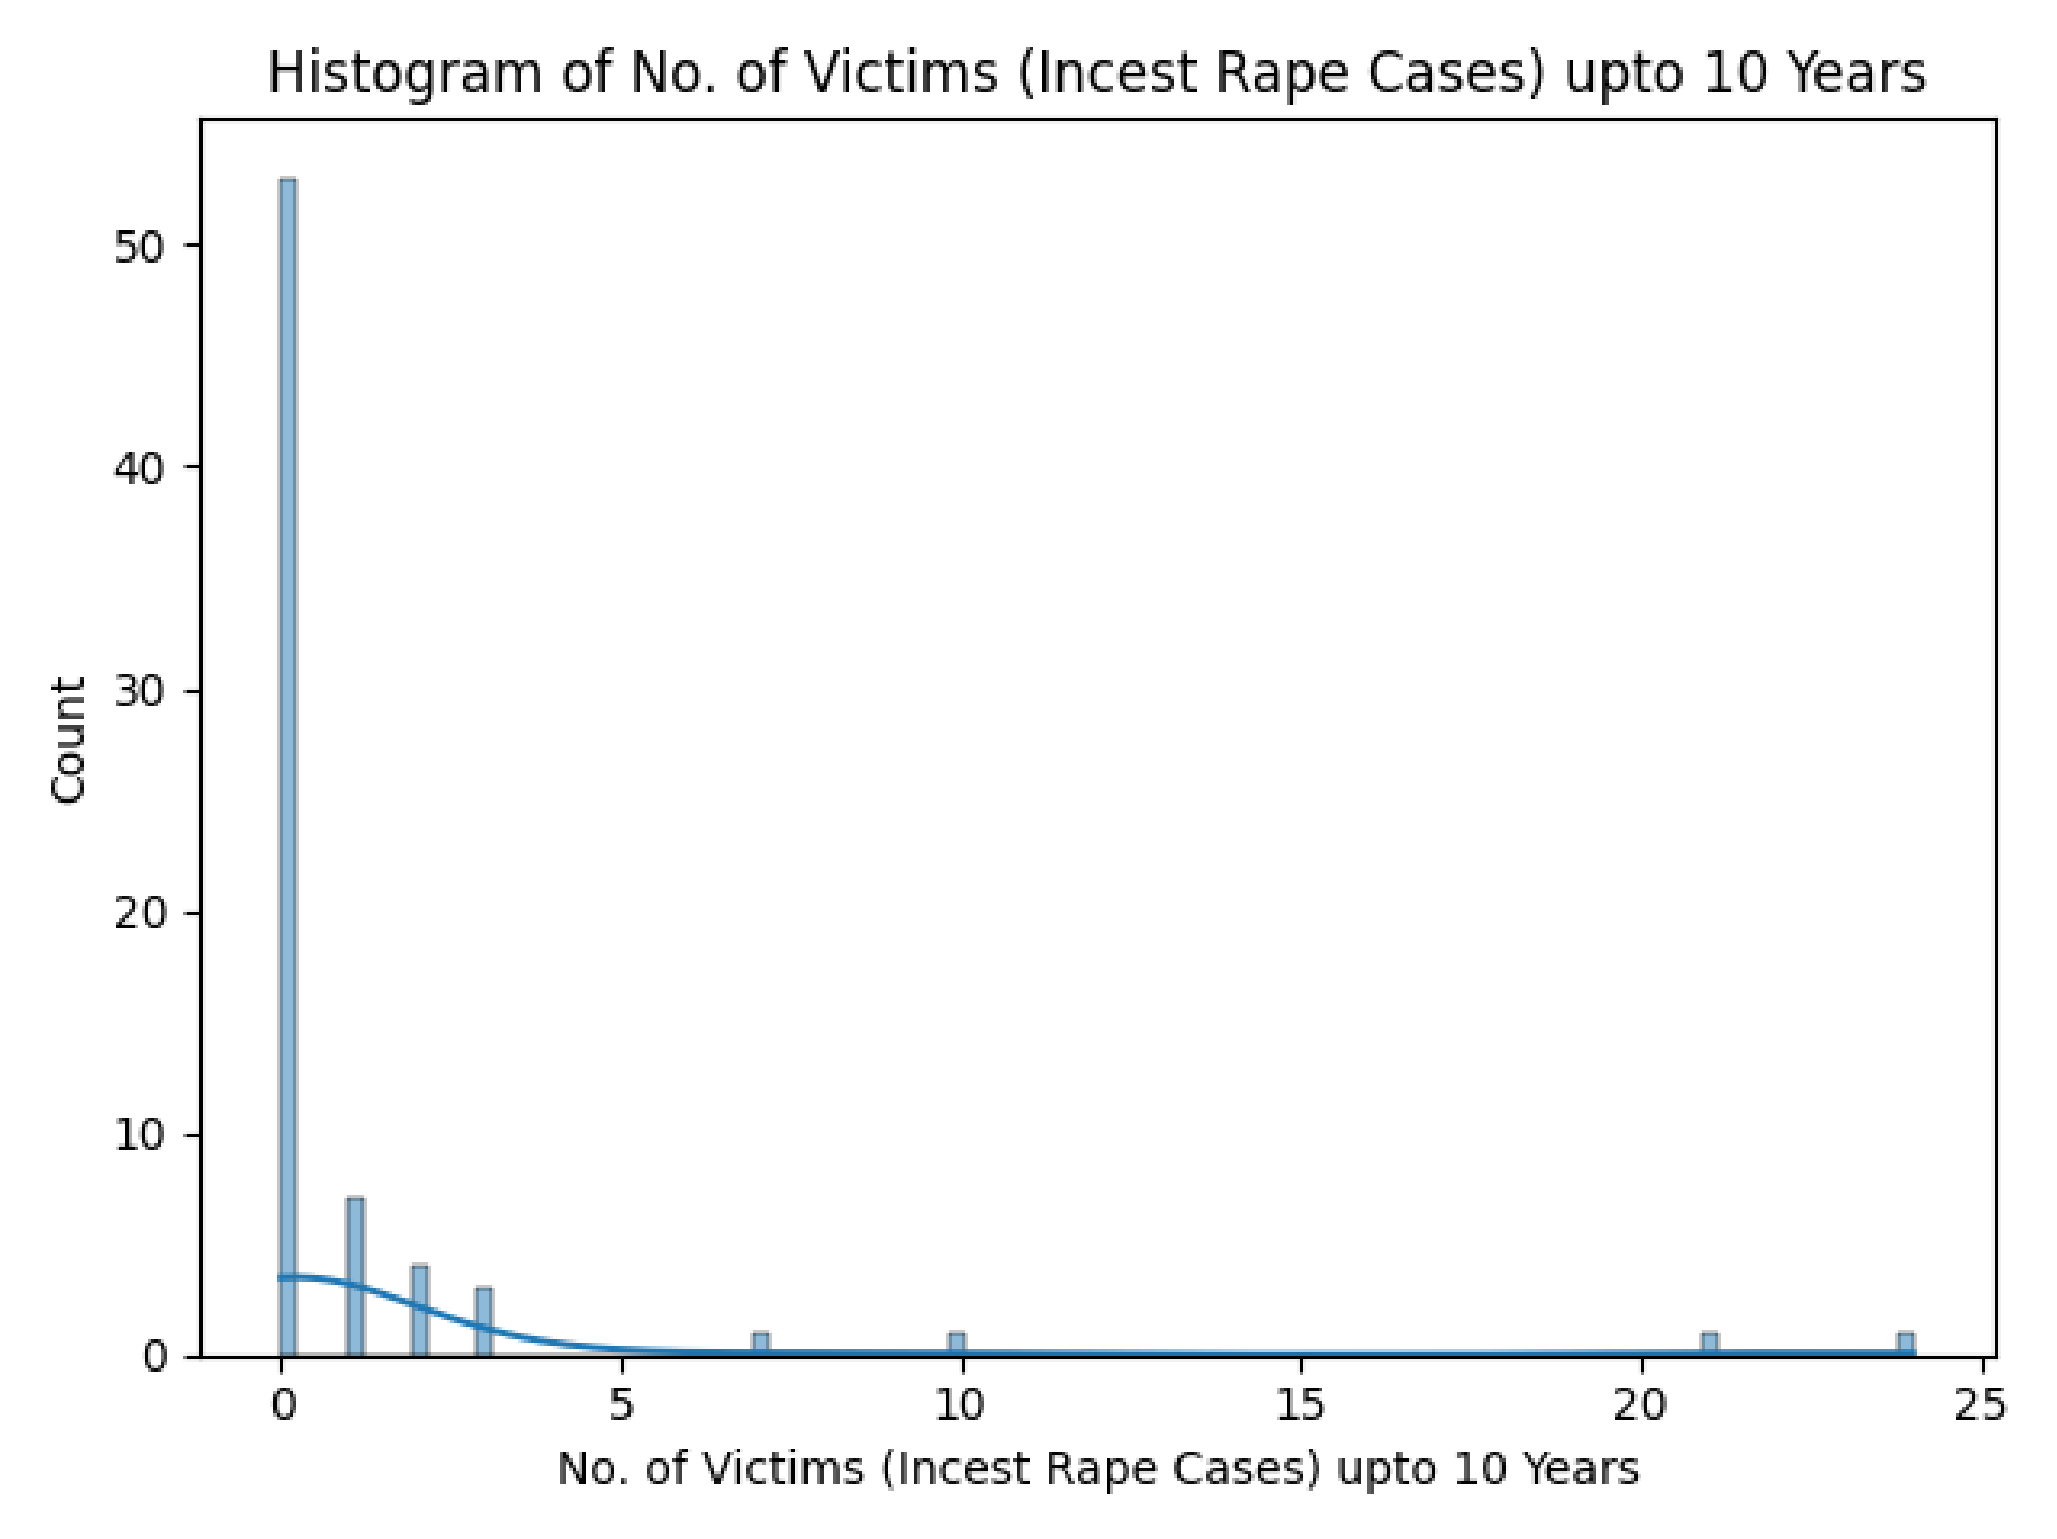

HISTOGRAMS

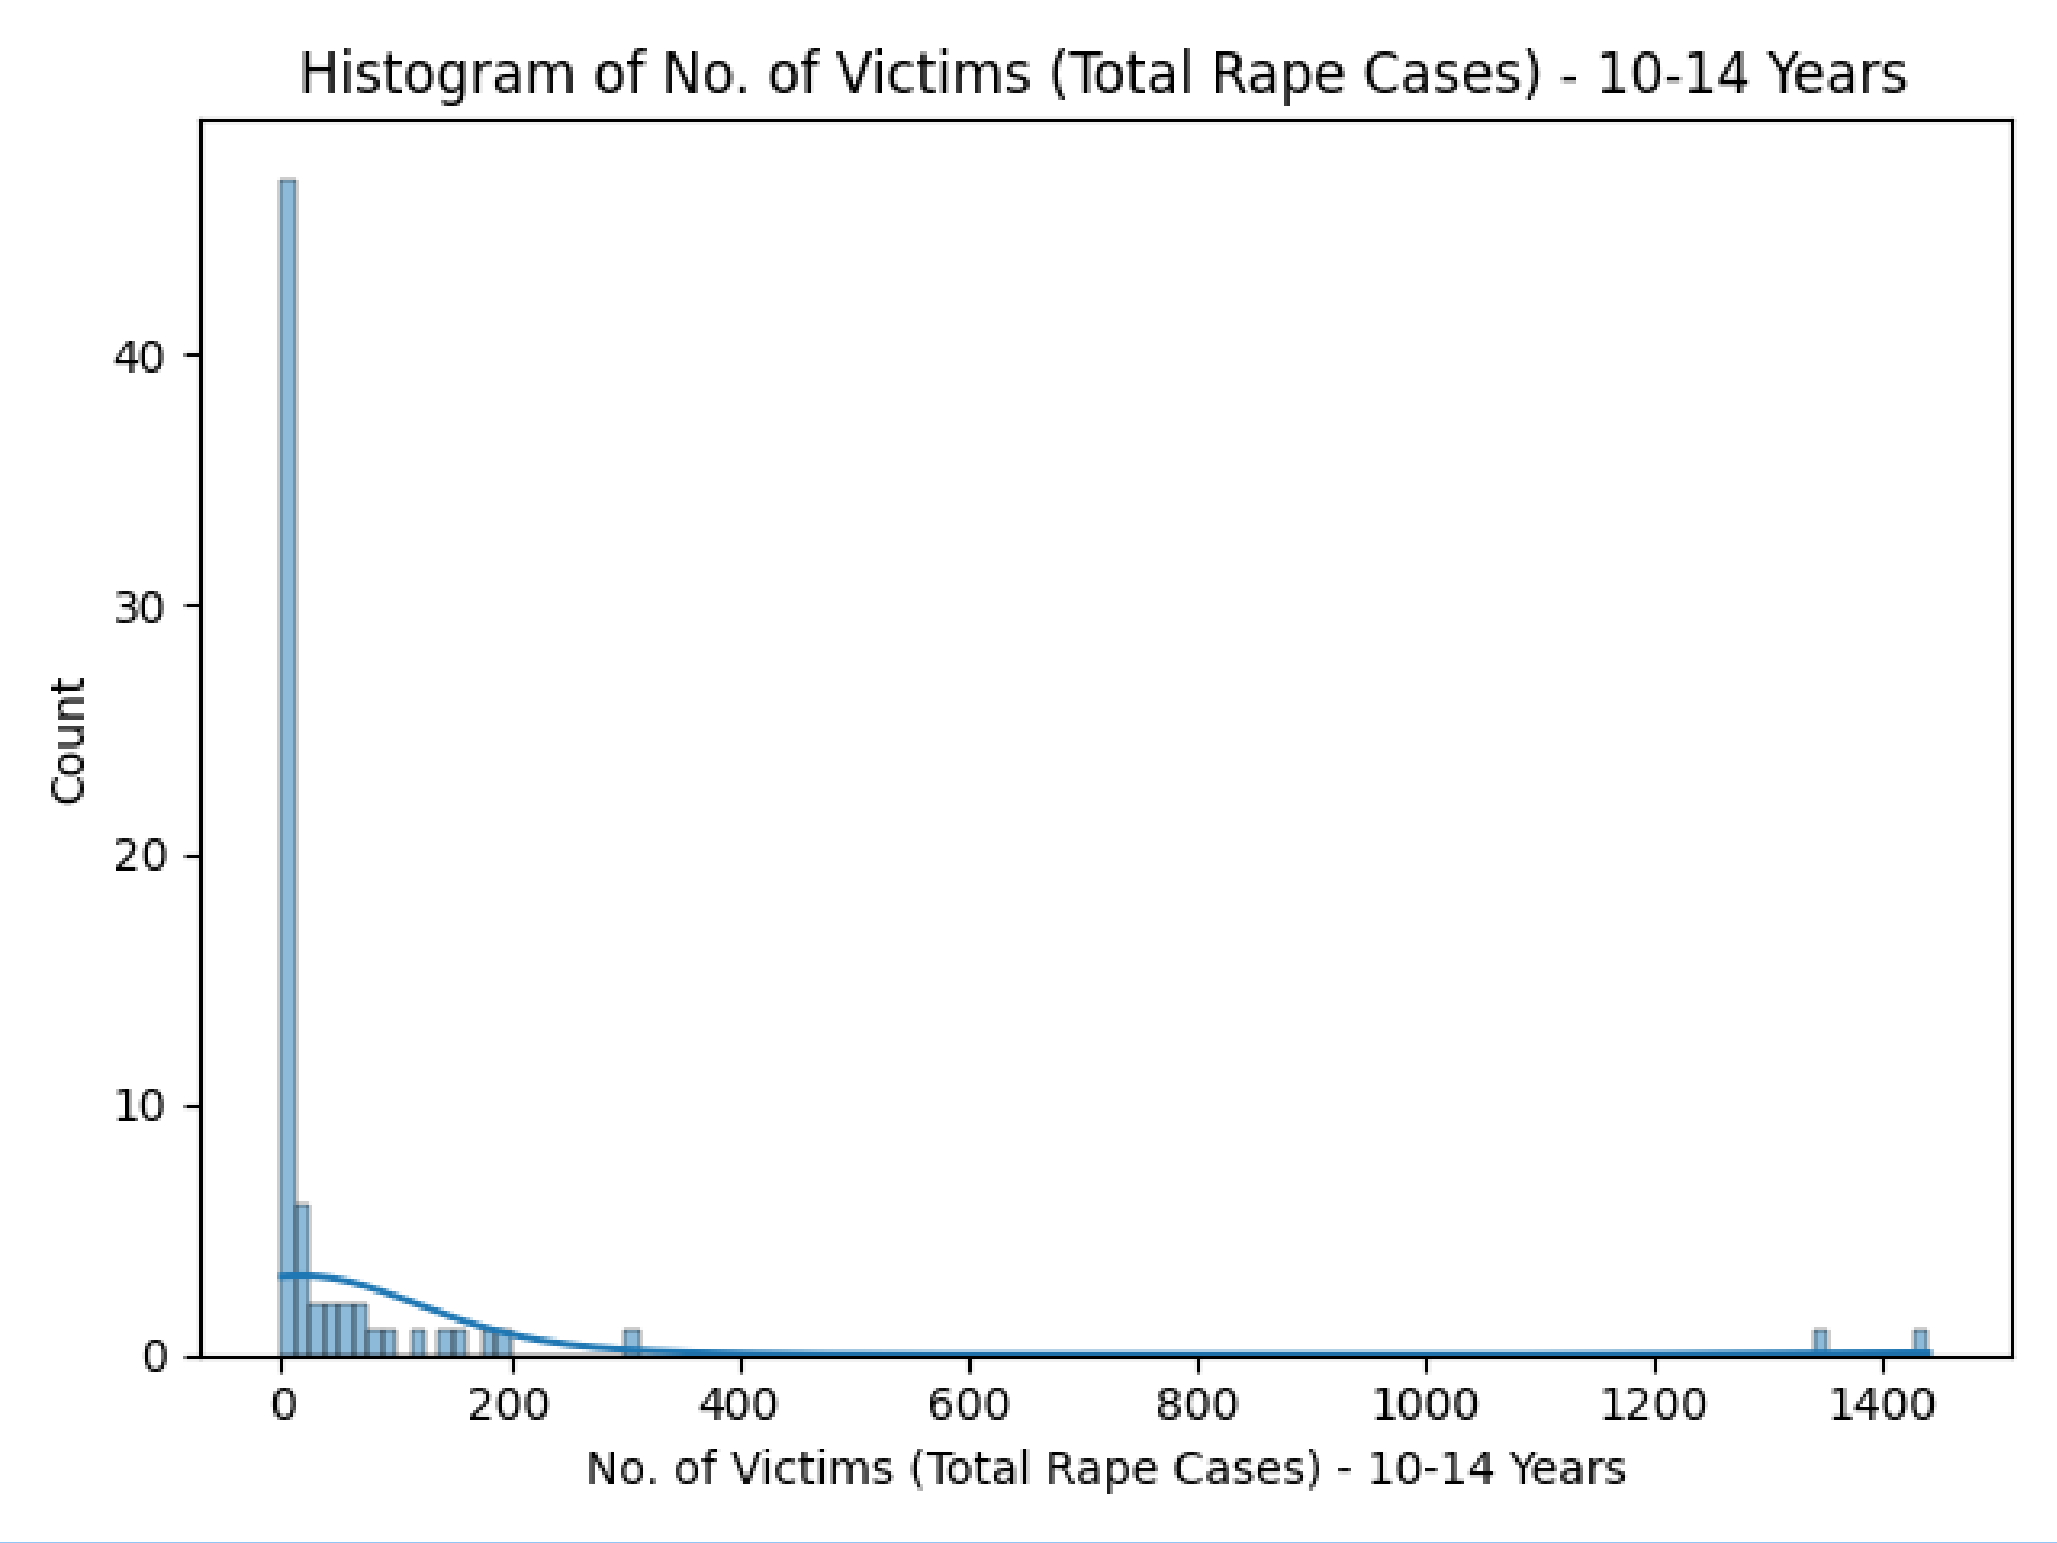

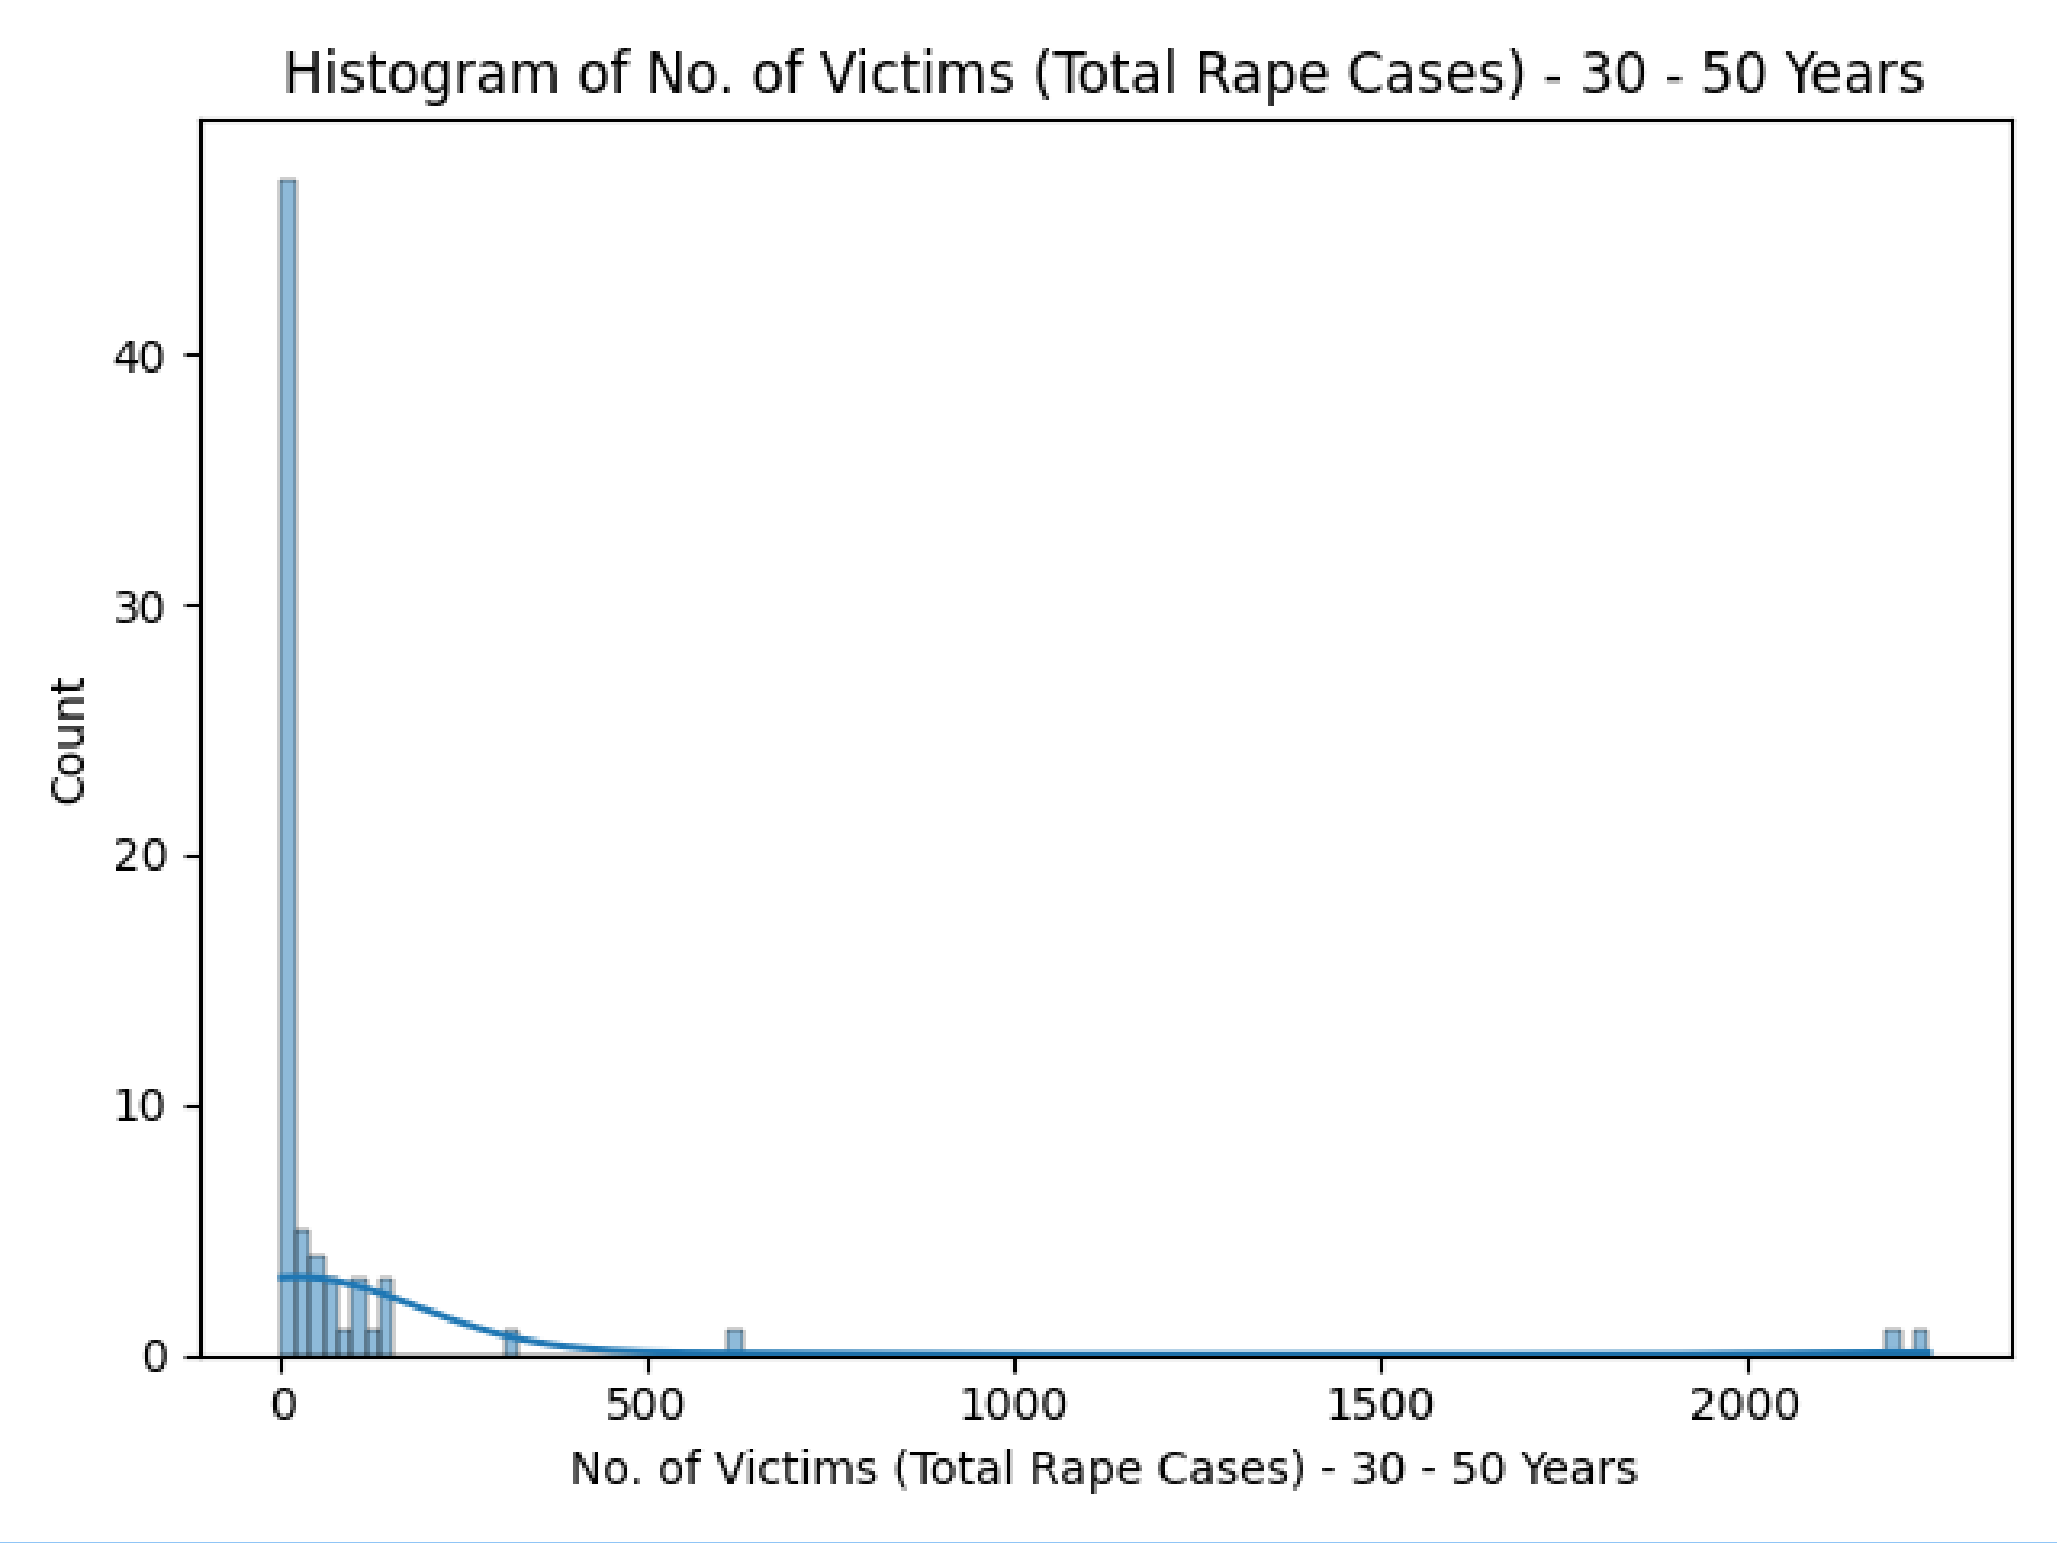

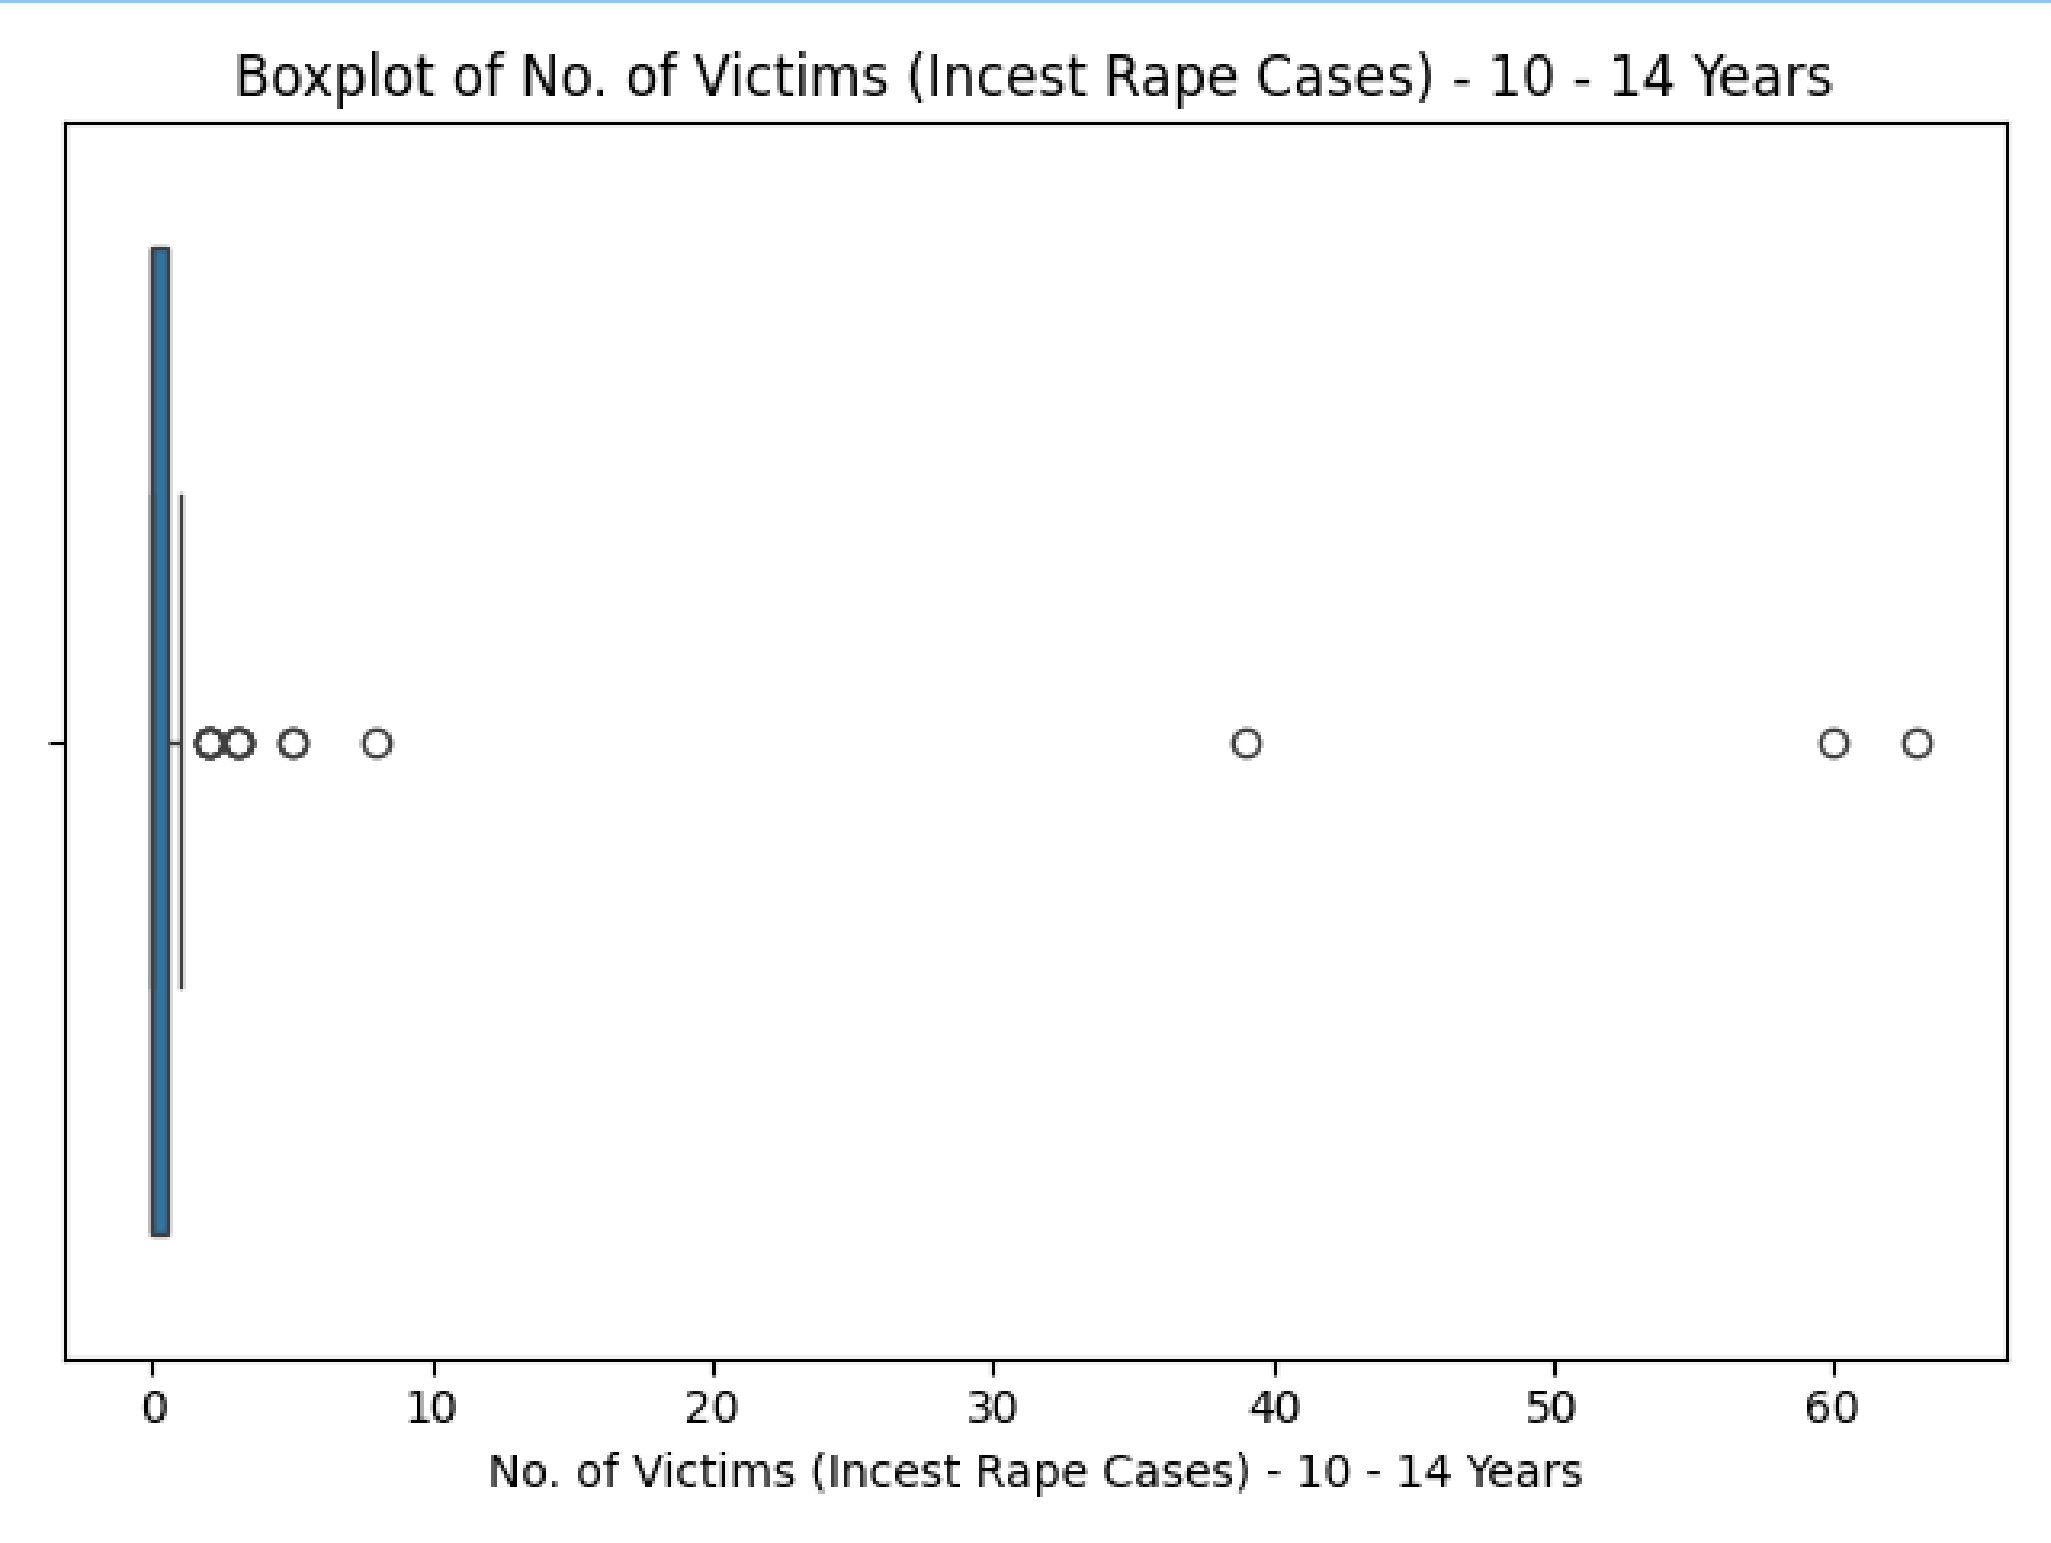

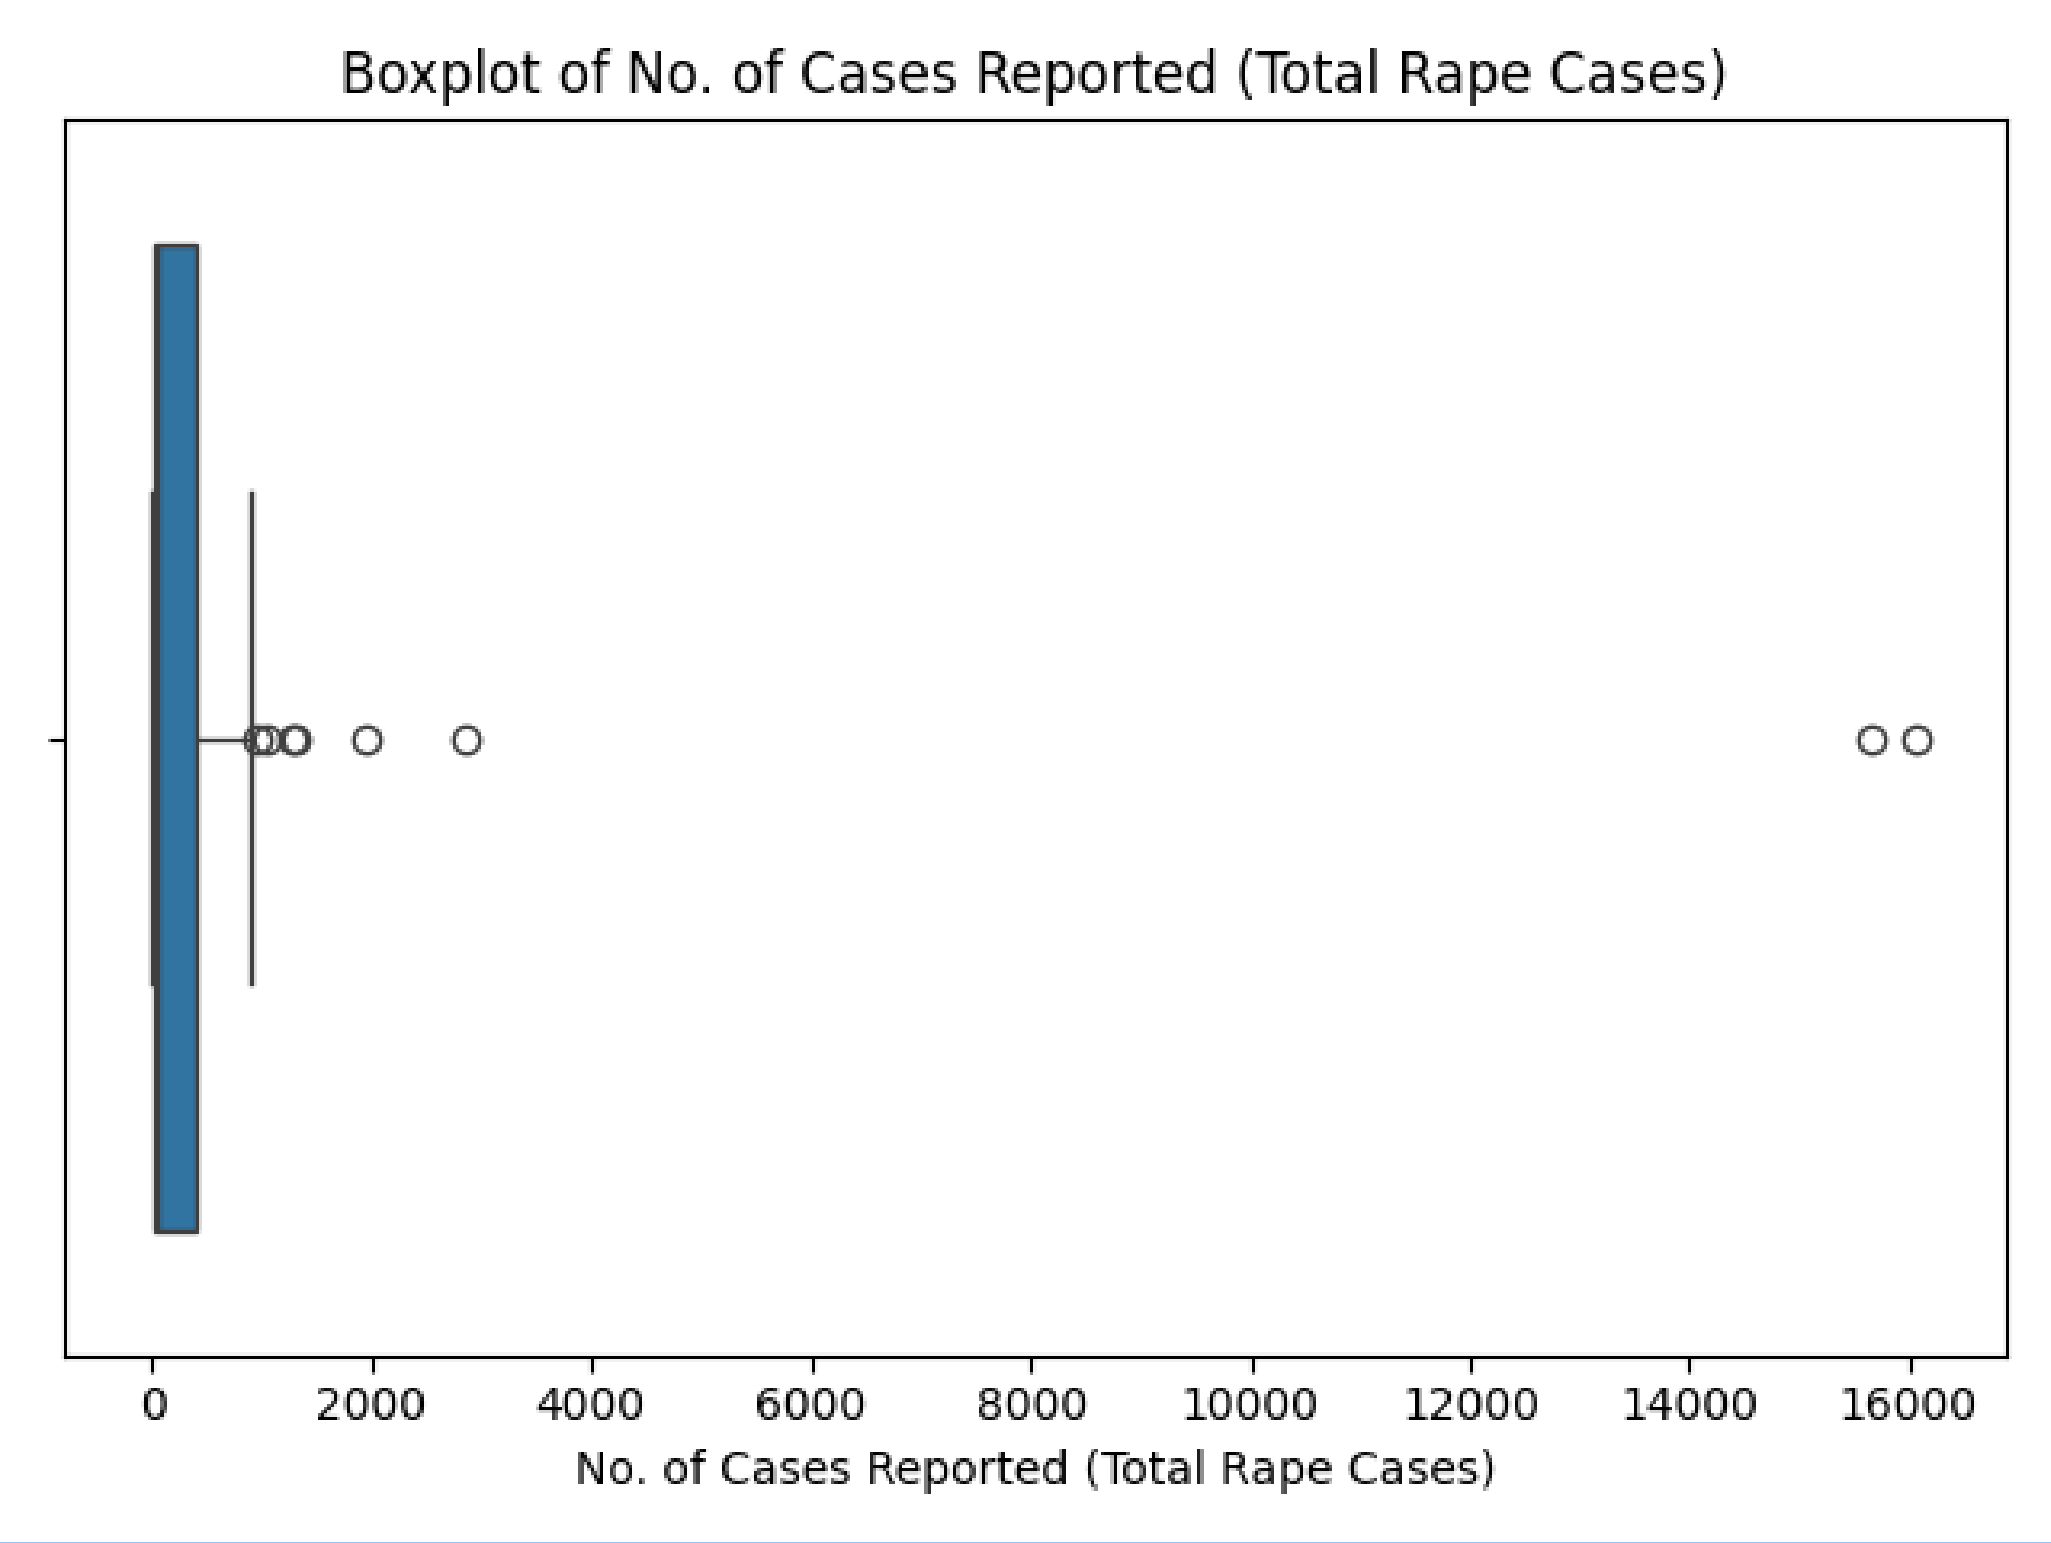

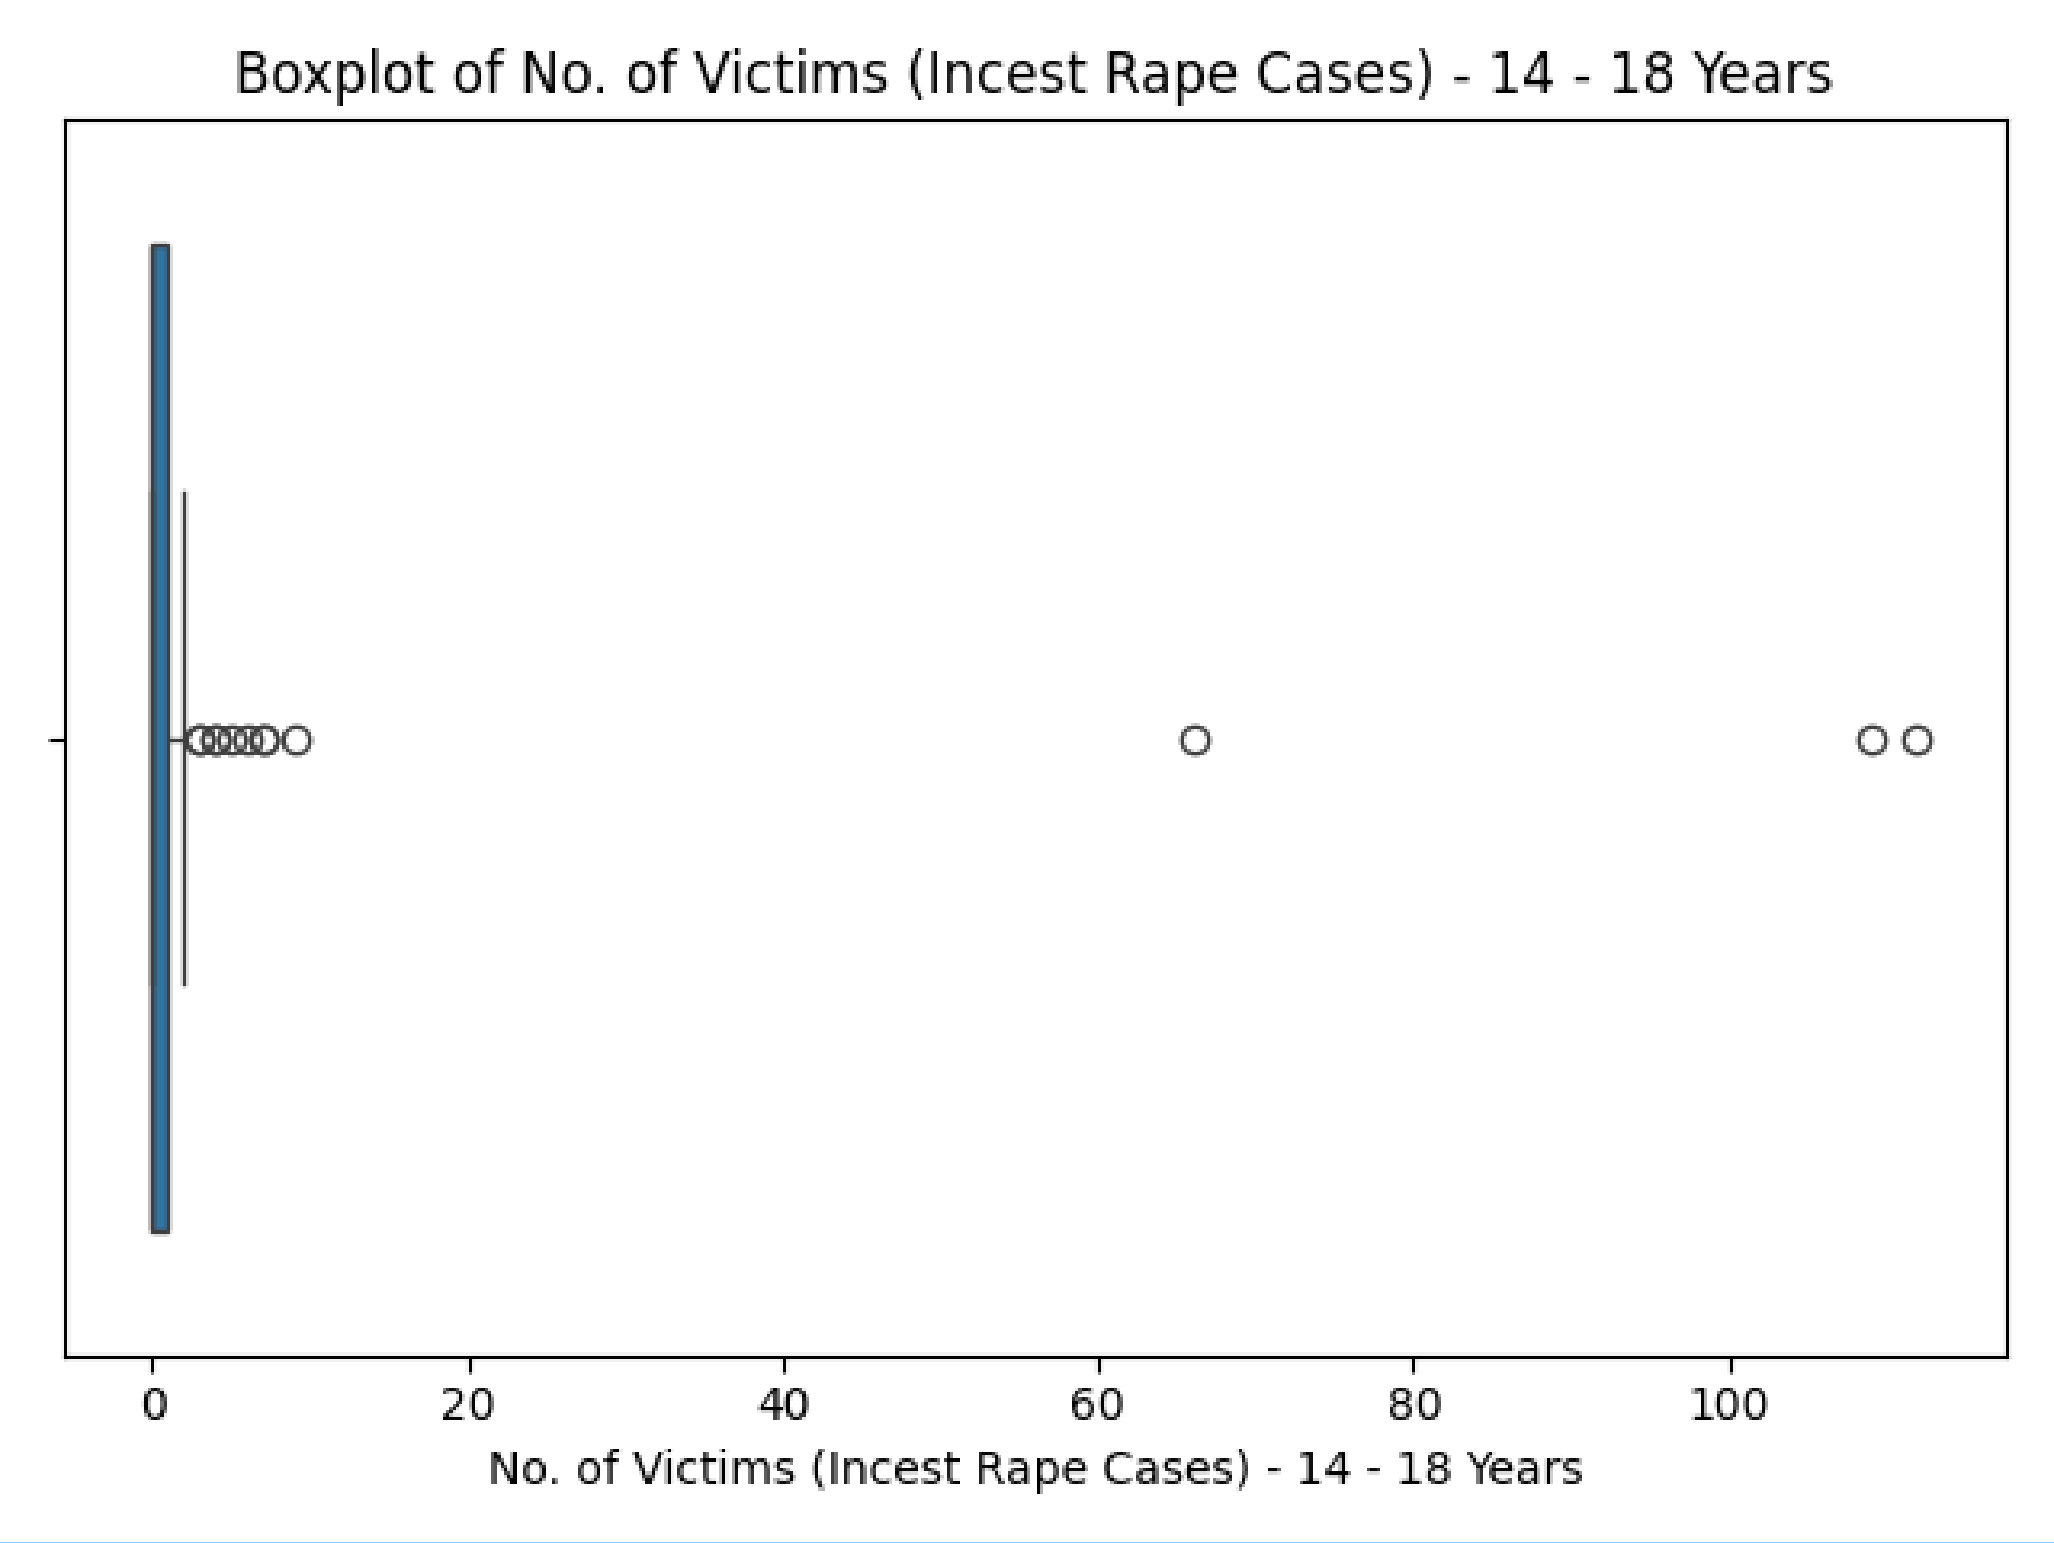

BOX PLOTS

Bivariate Analysis (Heatmap - Correlation Matrix)

4. To prepare the dataset for further analysis or modeling

Ready to proceed Data preprocessing and Data modeling.
